

THE INTEGRATION OF REGIONAL REFLECTION SEISMIC PROFILES AND GRAVITY DATASETS WITH DIFFERENT SPATIAL COVERAGE ASSOCIATED WITH GEOLOGICAL MODELS

MINEX CRC PROGRAM 2

Data from Drilling

PHD PROJECT

University of Western Australia

PRIMARY SUPERVISOR

Dr. Mark Lindsay

CO-SUPERVISORS

Prof. Mark Jessell, Dr. Jeremie Giraud, Dr. Vitaliy Ogarko, Dr. Guillaume Pirot (University of Western Australia), Neil Godber (Anglo American), Richard Chopping (GSWA)

RESEARCH PROJECT

At all scales, integrated geological and geophysical inversions have multiple datasets with different information contents available. This project will investigate how to use the typically spatially limited but higher resolution data (drillholes, 2D seismic lines etc.) to constrain larger-scale integrated geological and geophysical inversions.

PARTICIPATING ORGANISATIONS

THE UNIVERSITY OF
